477pp., soft cover, PLZ 43.00

This volume is the proceedings of the 10th International Conference on Noise Control which was held in Warsaw, Poland on 1995 June 20-22. This proceedings book contains five plenary session papers, all in English, on the following topics:

- Problems of noise control in Poland on the way to European integration
- European directives and standards for vibroacoustic protection
- Sound intensity: state-of-the-art in noise control of buildings
- Active control or passive control?
- Music and noise

There are also 56 invited and contributed papers in the book, 50 in English and 6 in Polish. The papers are divided into the following five categories:

- Fundamental problems
- Industrial noise
- Environmental noise
- Measurements and analysis
- Active methods

The conference was organized by the Acoustics Committee of the Polish Academy of Sciences, the Polish Acoustics Society, and the Central Institute for Labour Protection with the cooperation of the Chair of Mechanics and Vibroacoustics of the Mining and Metallurgy Academy and the Acoustics Section of the Building Research Institute.
