

Proceedings of the 15th International Congress on Acoustics

Proceedings of the 15th International Congress on Acoustics

ICA 95 Committee, N-7034 Trondheim, Norway

2400 pp. in 4 volumes, soft cover, NOK 1500 plus surface or air postage (NOK 165 or 200 in Europe, NOK 205 or 365 outside Europe)

The Proceedings of the 15th ICA, held in Trondheim, Norway at the end of 1995 June, consists of nearly 600 papers on all aspects of acoustics. The technical program of the Congress had four types of sessions, all of which are covered in the proceedings: plenary sessions, special structured sessions, sessions for contributed papers, and poster sessions. Distinguished lectures were given by P.V. Brü el and J.L. Flanagan. Plenary papers and structured sessions covered the following areas: aeroacoustics, architectural and building acoustics, atmospheric sound, bioacoustics, computational acoustics, geoacoustics, infrasound, medical acoustics, musical acoustics, noise, quantum and physical effects, physical acoustics, physiological and psychological acoustics, speech, transduction, underwater acoustics, ultrasonics, audio, and education in acoustics.
